

Cox san diego serves this area and they will not bring service to my house. Most of my neighbors would also like internet broadband access. The telephone and tv cable are ran on electrical poles making it very easy to deliver there product to my house. Houses just 3 or 4 poles away(1000ft) have cable. Cox wants to charge us 10,000 dollars each to bring in broadband. Please help, My wife is a telecommuter and she can't keep working if we don't get high speed access!!

Thank you very much, Curtis Krams
